

BlindSite® Range: Configurations

BlindSite is a state-of-the-art **handheld** non-contact-non-destructive scene search and evidence recovery technology featuring **GPS** time-date-location, easily accessible **metadata** and user **log** information, **touchscreen** UI interface, **USB** connectivity, **Wi-Fi** connectivity, removeable & rechargeable **battery**, and **mains charging**. For easier integration into current protocols, a **digital scale bar** is provided, removing the need for a physical scale/ruler. For ease of use, it is possible to request one or a combination of **fixed handles, neck strap, tripod, or gimbal** mounting slots. *We offer fully customized options should the below configurations not be appropriate for you requirements.*
